

# Earth Day Collage

## Materials:

Print out of Page 2, " ♥ Our Earth"

Blue paper

Green paper

Glue stick

2 small bowls

Table mat to protect work surface (optional)

Damp sponge

## Lesson:

1. Gather supplies.
2. Tear the blue paper into pieces, and place pieces into one of the bowls. Pieces should be all different shapes and sizes.
3. Tear green paper into pieces, and place them into the second bowl.
4. Look at the drawing of the earth. Where is the land, and where is the water? (It can be tricky to tell!)
5. Choose whichever colored paper you want to begin with: blue for water or green for land. Glue your paper pieces onto the earth, overlapping them to completely cover the space.
6. When you're all done, put your artwork in a safe place to dry.
7. Wash your hands if they are sticky.
8. Clean up your supplies, and wipe your table mat with a damp sponge.
